

Up the Creek Meats

- The program connects lake associations with farmers who protect water in the watershed where their lakes are located.
- These farmers use higher standards to build soil health as they produce high quality foods. They practice the Five Soil Health Principles to manage their operation. This in turn increases the amount of water that can infiltrate their soil to prevent run off pollution and flooding.
- These farmers use little or no :
 - Fertilizers
 - Pesticides
 - Herbicides
 - Antibiotics
 - Steroids

Their livestock is grass fed and produces exceptional tender and flavorful meat.

Thunder Lake Association is partnering up with:
